SUMMARY

I'm a software developer with years of experience and I love building stuff for the web. Although I started out as a front-end developer, over the years I've garnered pertinent skills with which I deliver a variety of services ranging from Web/UI Design, Front-end/Back-end Development and WordPress Themes/Plugins Development. I love the thrill of working on projects across different fields, more reason why I love working with software/MVP development agencies

RELEVANT EXPERIENCE

Lead Frontend Developer (Remote)   **2023 – present**
Mobirevo Inc.

- Work with a cross-functional team to develop and maintain products across event-management, hospitality and finance, using collaborative tools like git, slack, zoom etc
- Translate UI mockups to front-end code while ensuring responsiveness and adhering to web UX best practices.
- Test, monitor and ensure cross browser and device compatibility across new and existing projects.
- Integrate and implement custom and 3rd party APIs.
- Migrate Vanilla and ReactJS codebases to NextJS resulting in 80% increase in organic traffic and almost 90% increase in page load speeds.
- Provide support to backend engineers by contributing quick/urgent bug fixes when necessary to improve efficiency and ensure timely project delivery
- Was granted code contribution permissions on backend modules due to proficiency in Laravel and Node.js
- Engineered a complex web-based vector graphics editing web app similar to (Figma, Illustrator) using fabricJS and custom extensions.
- Developed and implemented a headless CMS with Wordpress and Next/ReactJS allowing a robust content management without sacrificing UX and modernity.
- Developed Wordpress themes and plugins in PHP, using modern library like TailwindCSS, alpineJS for better interactivity and code maintenance

Full Stack Developer (Contract)   **2023**
Blueportal Software.

- Developed multiple eCommerce solutions for a fashion business helping them expand their reach online, increasing potential revenue by at least 60%.
- Designed and developed website mockups, landing pages and interactive user interfaces.
- Optimized web pages for performance by implementing web optimization best practices, like cdn caching, minifications, serving images in .webp, implementing lighthouse audits.

Web Development Tutor (Contract)   **2023**
Webcapz Technologies.
- Mentored 5+ students from novice to full stack web developers
- Tutored students on HTML, CSS, TailwindCSS, PHP, MySQL

Freelance Web Developer
2020
- Increased brand equity and conversion by redesigning a car rental website from the mockups to deployment as a full stack engineer.
- Designed and developed high converting landing pages for multiple clients including official company websites.
